Tourtellotte Solutions announces new release for TS Sourcing *Industry leading application is enhanced for greater extensibility, flexibility and visibility*

WAYLAND, MA – September 13, 2005 – Tourtellotte Solutions, a software development and consulting company, announces the 2nd major release of the TS Sourcing application, making significant strides towards restoring this application to industry-leading status.

“Earlier this year, Tourtellotte Solutions communicated a very aggressive enhancement plan to our customers. We have now delivered two significant releases within six months of taking ownership of the code,” said Ed Tourtellotte, Founder and President of Tourtellotte Solutions. “These quality releases have provided significant value to our customers proving our ability to deliver complex solutions in a very compact timeframe”.

The two product releases to date have focused on visibility, extensibility and flexibility through functionality such as email alerting, the addition of user defined fields as well as the finalization of the Custom Process Framework. This Framework was developed to allow customers the ability to tailor the software to specific requirements that are needed outside of the normal flow of the TS Sourcing application. The company also certified on the Tomcat application server, providing an alternative to the current WebSphere deployment significantly reducing cost of entry and ongoing maintenance for customers.

“While we have provided valuable enhancements to the functionality for our current customers, we are not resting on our laurels. We recognize we still have a significant amount of work to do to be successful” said Cindy DiTullio, General Manager of Tourtellotte Solutions Sourcing. “We have been working very closely with our existing customer base to ensure that we are addressing their mission critical needs and supporting the growth of their businesses.”

Tourtellotte Solutions is currently working on a full rollout of a new UI design in Q1 2006. The TS designers’ have been working closely with current TS Sourcing customers to develop an optimal solution of consistent screen design, messaging and ease of navigation. In addition, TS Sourcing and its partners are deploying an aggressive sales campaign with a goal of closing new business in early 2006.

About Tourtellotte Solutions

Tourtellotte Solutions is a software and services company offering packaged and custom-built technology solutions that reduce the complexity and variability of supply chain processes. Tourtellotte Solutions uses its domain expertise, deep technical knowledge, and a disciplined consulting approach to optimize underperforming products and the processes that underlie them. Our products include the industry leading **TS Sourcing** (formerly QRS Sourcing) and the groundbreaking clinical trials modeler/forecaster **TS Visualize**.
